COOL TEX POLO T-SHIRTS
A special technology, fabric which protects the skin from harmful UV rays. UV protection avoids sunburn and protects your skin for long period, which keeps you healthy and fresh. Sweat absorbent feature keeps the body dry and comfortable; it pulls the moisture away from the skin to the surface of the fabric.
The Key Feature of the fabric is that it is constructed in a way where the inside of the fabric worn next to the skin is predominantly cotton and the outside is polyester. This therefore combines the comfort of cotton with the hardwearing properties of polyester.
